

FME: View Work Order Request

Section A - Requestor (Requestor Identification)		
Request Number: 119566	Program/Division: SAIC	
Date: 10/28/2002	Center: 200201534114	
Requestor: STAUFFER, CARROLL D (3018465614)	Contact: STAUFFER, CARR	
Section B - Requestor (Request Detail)		
Work Location: 539 (List all Building(s) Involved in Request)		
Phone Numbers Involved: (Telephone Installation/Modification Only)		
Special Requirements: N - CGMP N - Hazardous Materials		
Description of Work: Install pressue reducing valve, pneumatic temperature control valves with pilot positioners and air supply to valves on the replacement hot water converter. Remove the existing hot water storage tank and associated piping.		
Justification of Work: The replacement hot water converter needs to have more sensitive steam control valves to eliminate the temperature override. Removing the hot water storage will allow more space in the basement.		
Special Considerations: (Coordination, Schedule, etc.)		
Required by Date: 11/15/2001		
Contract Representative: Timothy L. Lenhart
